

# Daminion Bug Report

v0.9.8 (build 711)

03-Jan-2012

**Problem Description:** When trying to import more than 10,000 or so items into an existing catalog, the Daminion program ALWAYS crashes and displays the type of error message shown below. On the other hand, smaller imports of under 9000 or so items never seem to fail. I have never had a successful import of over 10,000 items.

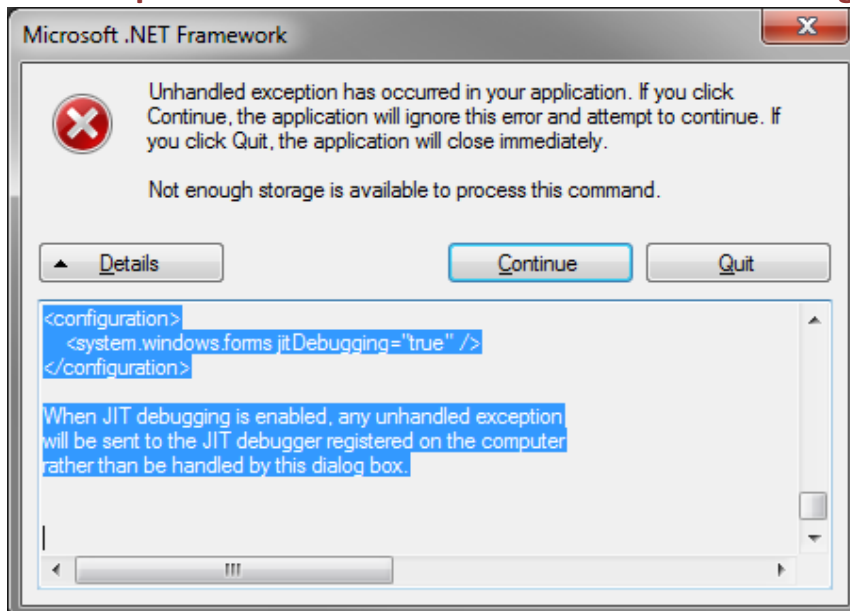

I have tried two methods of initiating the imports. One method is by dragging-and-dropping OS file folders on to the Daminion thumbnails panel. The other method is to use the Daminion menus selection "File==>Add Files". Both methods behave the same.

In Catalog at Start of Import	Selected for Import	Import Succeed? Y/N	Crashed with Progress Indicator Showing	Actually Imported	In Catalog
36517	21951	N	12892	9037	45554
45554	22499	N	11988	10479	56033
56033	18956 165.77 GB	N	11543	7394	63427
63427	12756 86.63 GB	N	7527	4910	68337

Note that if the progress indicator value at crash time is subtracted from the "Selected for Import" number, the result is always slightly larger than the number of files actually imported. Not sure why that is.

**System Specs:** Daminion 0.9.8 (build 711), Win7 Pro SP1 x64, i7 Hex core 3.2GHz, Nvidia GTX580, Intel SSHD 250MB for OS, Internal Data 2 x RAID0 using 1TB WD Caviar Blacks, 1 x 2TB WD caviar black internal and several 3TB USB3.0 WD MyBook Essential External drives and 2 x 1920x1280

**Crash report for when 45554 items were in the catalog at start of the import.**

See the end of this message for details on invoking just-in-time (JIT) debugging instead of this dialog box.

\*\*\*\*\* JIT Debugging \*\*\*\*\*

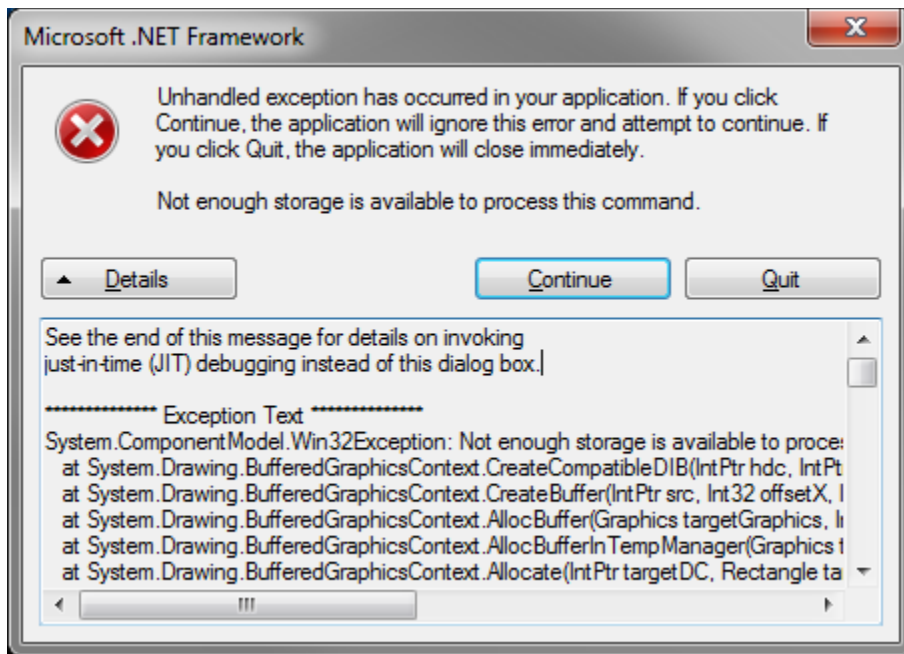

To enable just-in-time (JIT) debugging, the .config file for this application or computer (machine.config) must have the jitDebugging value set in the system.windows.forms section. The application must also be compiled with debugging enabled.

For example:

```
<configuration>  
  <system.windows.forms jitDebugging="true" />  
</configuration>
```

When JIT debugging is enabled, any unhandled exception will be sent to the JIT debugger registered on the computer rather than be handled by this dialog box.

## Crash report for when there were 63427 items in the catalog at start of import.

See the end of this message for details on invoking just-in-time (JIT) debugging instead of this dialog box.

\*\*\*\*\* Exception Text \*\*\*\*\*

```

\*\*\*\*\* JIT Debugging \*\*\*\*\*

To enable just-in-time (JIT) debugging, the .config file for this application or computer (machine.config) must have the jitDebugging value set in the system.windows.forms section. The application must also be compiled with debugging enabled.

For example:

```
<configuration>  
  <system.windows.forms jitDebugging="true" />  
</configuration>
```

When JIT debugging is enabled, any unhandled exception will be sent to the JIT debugger registered on the computer rather than be handled by this dialog box.
